

WEB based and 3G, 4G-LTE, and 5G software applications

SSBC-CACH SA started telecommunications applications in 1988 while developing a callback system from SFR introducing the night-over-day switching concept today commonly used by telco-companies between the USA and Europe.

SSBC-CACH SA in the '90s discovered Curvelets and began operations within NOKIA OY of Finland.

We own an impressive set of libraries, saving time and money, all available to the solution of our client's tasks.
